

The Ohana SUP boards were introduced in 2008 with the idea to take the speed of their paddle boards to the Stand Up category. The outcome was amazing: at the Battle of Up they took first in Men's Open, and Women's elite, and a second in Men's Elite.

Ohana Paddle Board Company was founded in 1996 by Bob Reed and Russel Coble, two high school buddies from Orange County. Their passion for the oceanic lifestyle marked the advent of Ohana prone paddleboards in 1996; Russell's race experience in outriggers, surfboards and paddleboards and Bob's talent for design and high performance paddling: in the ensuing years Ohana won almost every major paddle race in the world.

OHANA

ABOUT THE BOARDS:

10'6 Ohana Boardworks TR - A smaller fun version of the 12'6 and 14' TR's. With the same design characteristics, this model was built for juniors or smaller men and women that want the same speed and stability attributed to the 12'6 & 14', without the additional length and volume.

Designed for: Fun, Fast and stable, the 10'6 TR completes the quiver for the whole family.

12'6 Ohana Boardworks TR - Ohana developed the 12-6 TR (Touring/Race) to be an all around board for any level of paddler. From cruising on flat water, fitness training and competitive racing the TR is a great choice for a large audience. The cutting nose entry and stable rail and bottom contours make this shape perform extremely well in rough and windy conditions into the wind, down wind and mixed swells.

Designed for: Flat water conditions the 12-6 TR has a smooth entry and great tail release.

14'0 Ohana Boardworks TR - Ohana developed the 14' TR (Touring/Race) to be an all around board for any level of paddler. This board has proved to be extremely stable and very fast. The cutting nose entry and stable rail and bottom contours make this shape perform extremely well in rough and windy conditions into the wind, down wind and mixed swells.

Designed for: Flat water conditions the 14' TR is the most quiet board we have developed.

OHANA

10'6, 12'6 and 14'0 TR series

The deck is gloss and polish with a sanded bottom finish. The TR series shape features a domed deck to repel water over the top surface and a flat console for foot placement. The console runs out the tail to remove any water which may wash onto the deck area.
